

Marsh Lake Nature Preserve

County: Steuben
Ownership: Fish and Wildlife - IDNR

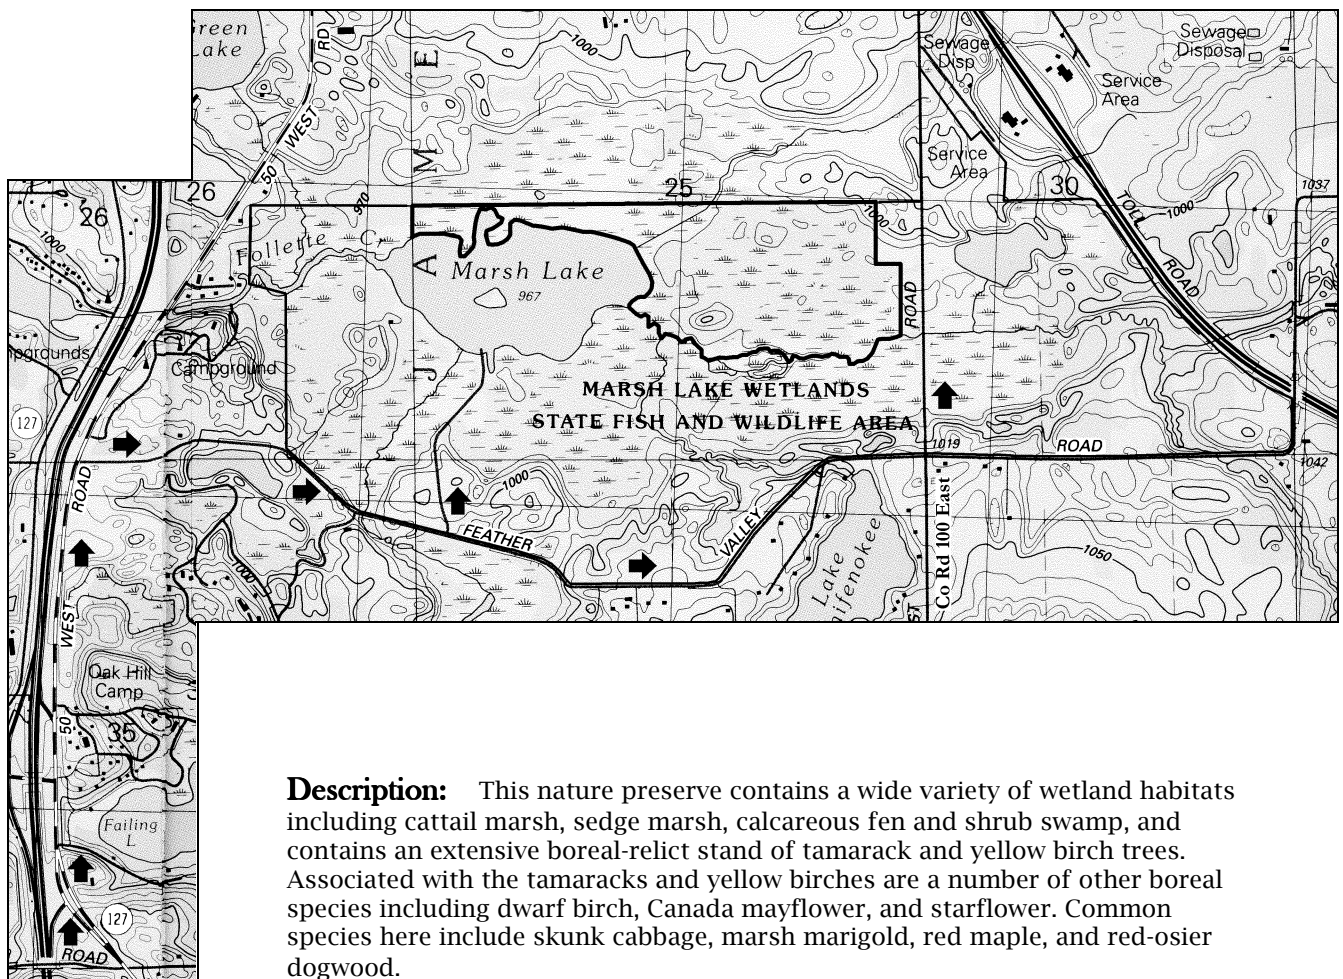

Size: 103 acres

Location and Access

Parking lot; no trails. Caution is advised since hunting is allowed in season. Exit I-69 at the Pokagon exit. Proceed north on the road that parallels the east side of I-69 to Feather Valley Rd. and turn east (right). For boat access, go east on Feather Valley Rd. about 0.75 mi. to the entrance to the Marsh Lake public access site. For foot access, there is a designated parking lot on Co. Rd. 100E near the northeast corner of the preserve.

— nature preserve
— State Fish & Wildlife Area

Description: This nature preserve contains a wide variety of wetland habitats including cattail marsh, sedge marsh, calcareous fen and shrub swamp, and contains an extensive boreal-relict stand of tamarack and yellow birch trees. Associated with the tamaracks and yellow birches are a number of other boreal species including dwarf birch, Canada mayflower, and starflower. Common species here include skunk cabbage, marsh marigold, red maple, and red-osier dogwood.
