Perimeter Fencing (Central State)	-0-
Storage Building	-0-
TOTAL	<u>777,505</u>

STREAM POLLUTION CONTROL

GRANTS	15,680,000
--------	------------

The state may make grants, as funds are available, to municipalities to assist them in financing the construction of those portions of water pollution control projects which qualify for federal aid and assistance. The state's contribution toward the construction of water pollution control projects may not exceed ten percent (10%) of the eligible cost of each project. It is the purpose to provide state funds for any portions of such projects as qualify under the federal provisions.

To the extent that funds are available, the water pollution control board, with the approval of the state budget agency and the governor, may authorize additional grants to local communities, on request of those communities, where the actual contract price proves greater than the estimate originally submitted to the board. However, all

appropriations to match local funds shall first, on an annual basis, be distributed to all communities in amounts shown on the priority list as annually established by the water pollution control board, and the state's share of these additional grants may not exceed ten percent (10%).

The stream pollution control board, subject to the final approval of the state budget agency and the governor, on recommendation of the state budget committee, may approve grants to municipalities; the municipalities shall use these grants for improving or accomplishing water pollution control projects.

#### CORRECTIONS

##### INDIANA STATE PRISON

Preventive Maintenance	475,000
New Gates and Operators (No. 1 and No. 2)	22,000
Renovation of Perimeter Wall	20,000

System	<u>10,000</u>
TOTAL	784,703

The allocations for the Indiana veterans' home are hereby appropriated from the veterans' home building fund established by IC 10-6-19.

#### STEAM POLLUTION CONTROL GRANTS

Total Allocation	12,600,000
------------------	------------

The state may make grants, as funds are available, to municipalities to assist them in financing the construction of those portions of water pollution control projects which qualify for federal aid and assistance. The state's contribution toward the construction of water pollution control projects may not exceed ten percent (10%) of the eligible cost of each project. It is the purpose to provide state funds for any portions of such projects as qualify under the federal provisions.

To the extent that funds are available, the water pollution control board, with the approval of the governor and the state budget agency, may authorize additional grants to local communities, on request of those communities, where the actual contract price proves greater than the estimate originally submitted to the board. However, all appropriations to match local funds shall first, on an annual basis, be distributed to all communities in amounts shown on the priority list as annually established by the water pollution control board, and the state's share of these additional grants may not exceed ten percent (10%).

The stream pollution control board, subject to the final approval of the governor and the state budget agency, on recommendation of the

state budget committee, may approve grants to municipalities; the municipalities shall use these grants for improving or accomplishing water pollution control projects.

#### CORRECTIONS

##### WORK RELEASE CENTERS

Preventive Maintenance	74,654
Gutters and Downspouts (South Bend)	4,500
Convert Oil to Gas (South Bend)	7,500
